

InnovAI AI Workforce Academy

Curriculum Framework v1.0

Learning Path

AI Associate → AI Platform Specialist / AI Infrastructure Specialist → AI Infrastructure Architect

AI Associate

Objective: Build strong foundations in AI, Linux, Python, Networking, Cloud, Containers and DevOps.

Core Modules

1. AI Fundamentals
2. Computing Fundamentals
3. Linux Fundamentals
4. Python Programming
5. Networking Fundamentals
6. Cloud Fundamentals
7. Containers & Kubernetes Basics
8. Git, GitHub & DevOps
9. AI Infrastructure Overview
10. Foundation Labs

Expected Skills

• Installation • Configuration • Automation • Troubleshooting • Documentation • Team collaboration

Professional Certification Path

- Linux Foundation Certified IT Associate (LFCA)
- Certified Kubernetes Application Developer (CKAD) - after additional Kubernetes practice
- Cisco CCNA
- CompTIA Linux+
- Python Institute PCEP

AI Platform Specialist

Objective: Build, deploy and operate AI platforms.

Core Modules

1. Advanced Linux
2. Advanced Python
3. Docker & Kubernetes

4. AI Frameworks
5. Model Serving
6. MLOps
7. CI/CD
8. Infrastructure as Code
9. Workflow Orchestration
10. Observability
11. Platform Security
12. Capstone

Expected Skills

• Installation • Configuration • Automation • Troubleshooting • Documentation • Team collaboration

Professional Certification Path

- Certified Kubernetes Administrator (CKA)
- Certified Kubernetes Security Specialist (CKS)
- Linux Foundation Kubernetes certifications
- NVIDIA Certified Associate / Professional AI certifications (role appropriate)
- HashiCorp Terraform Associate

AI Infrastructure Specialist

Objective: Deploy and operate GPU clusters and AI infrastructure.

Core Modules

1. Advanced Linux
2. AI Server Hardware
3. GPU Architecture
4. AI Networking
5. AI Storage
6. Kubernetes for GPU Clusters
7. NVIDIA AI Software Stack
8. Automation
9. Monitoring
10. AI Infrastructure SRE
11. AI Cluster Operations
12. Capstone

Expected Skills

• Installation • Configuration • Automation • Troubleshooting • Documentation • Team collaboration

Professional Certification Path

- NVIDIA Certified Associate AI Infrastructure & Operations (where available)
- Red Hat Certified System Administrator (RHCSA)
- Certified Kubernetes Administrator (CKA)
- Linux Foundation Certified System Administrator (LFCS)
- Cisco CCNP Enterprise (recommended progression)

AI Infrastructure Architect

Objective: Design enterprise AI platforms and infrastructure.

Core Modules

1. Enterprise AI Architecture
2. GPU Cluster Architecture
3. Network Architecture
4. Storage Architecture
5. Hybrid & Multi-Cloud
6. Scalability
7. HA/DR
8. Security Architecture
9. Governance
10. Performance Engineering
11. Architecture Documentation
12. Enterprise Capstone

Expected Skills

• Installation • Configuration • Automation • Troubleshooting • Documentation • Team collaboration

Professional Certification Path

- Google Cloud Professional Cloud Architect
- Microsoft Azure Solutions Architect Expert
- AWS Certified Solutions Architect – Professional
- Red Hat Certified Architect (optional progression)
- NVIDIA advanced enterprise AI certifications (role dependent)

Suggested Delivery

Program	Duration	Labs	Capstone
AI Associate	8 Weeks	40%	Foundation Project
AI Platform Specialist	10–12 Weeks	60%	Platform Project

AI Infrastructure Specialist	10–12 Weeks	70%	GPU Cluster Project
AI Infrastructure Architect	8 Weeks	50%	Enterprise Architecture Design
